

Dančák M., Duchoslav M. & Trávníček B. (2012): Taxonomy and cytogeography of the *Molinia caerulea* complex in central Europe. – *Preslia* 84: 351–374.

Electronic Appendix 1. – List of *Molinia* localities accompanied by brief descriptions of habitats, geographical coordinates, date of sampling, collector's name, DNA-ploidy levels and chromosome numbers (only when counted), and number of plants analysed of the populations used in this study (in parentheses). Tetraploid and hexaploid plants represent taxon *Molinia caerulea* (L.) Moench, octoploid plants represent taxon *M. arundinacea* subsp. *freyi* Dančák, and dodecaploid plants represent taxon *M. arundinacea* Schrank subsp. *arundinacea*. Localities not provided with a collector's name were examined by the first author (M. Dančák). Populations whose plants were used as standards in flow-cytometric analyses are marked with a section sign ("§"). Populations used for the biometric study are marked with an asterisk. Abbreviations of countries: AT – Austria, BG – Bulgaria, CZ – Czech Republic, DE – Germany, EE – Estonia, ES – Spain, FR – France, GR – Greece, HR – Croatia, HU – Hungary, IT – Italy, NO – Norway, PL – Poland, RO – Romania, RU – Russia, SE – Sweden, SI – Slovenia, SK – Slovakia.
