

Electronic Appendix 1 List of species recorded in all 282 samples with total occurrence higher than two. Target species are displayed in bold, endangerment is considered according to Holub & Procházka 2000 (CR-critically endangered, EN – endangered, VU-vulnerable, NT-near threatened), origin according to Pyšek et al. 2002 (arch-archeophytes, neo-neophytes, empty-indigenous) and class according to Ellenberg et al. (1991) and Chytrý & Tichý (2003).

	Occurrences	Endangerment	Origin	Class
<i>Acer campestre</i>	62			<i>Querc-Fagetea</i>
<i>Acer platanoides</i>	7			<i>Querc-Fagetea</i>
<i>Acer pseudoplatanus</i>	4			<i>Querc-Fagetea</i>
<i>Acinos arvensis</i>	6			Rest
<i>Adonis aestivalis</i>	10	EN	arch	Synanthropic
<i>Aegopodium podagraria</i>	12			Synanthropic
<i>Aethusa cynapium</i>	8	NT	arch	Synanthropic
<i>Agrimonia eupatoria</i>	23			<i>Trifolio-Geranieta</i>
<i>Agrostis capillaris</i>	21			Rest
<i>Agrostis gigantea</i>	24		neo	Rest
<i>Agrostis stolonifera</i>	18			Synanthropic
<i>Achillea millefolium</i> agg.	121			Rest
<i>Alchemilla species</i>	9			Rest
<i>Alliaria petiolata</i>	13			Synanthropic
<i>Allium vineale</i>	3			Synanthropic
<i>Alopecurus pratensis</i>	17			Rest
<i>Anagallis arvensis</i>	18		arch	Synanthropic
<i>Angelica sylvestris</i>	10			Rest
<i>Anthemis arvensis</i>	6		arch	Synanthropic
<i>Anthoxanthum odoratum</i>	4			Rest
<i>Anthriscus sylvestris</i>	32			Rest
<i>Apera spica-venti</i>	27		arch	Synanthropic
<i>Arabis hirsuta</i>	4			Rest
<i>Arabidopsis thaliana</i>	3			Rest
<i>Arctium tomentosum</i>	20		arch	Synanthropic
<i>Arenaria serpyllifolia</i>	14			Rest
<i>Arrhenatherum elatius</i>	111			Rest
<i>Artemisia vulgaris</i>	61			Synanthropic
<i>Asperula cynanchica</i>	18			<i>Festuco-Brometea</i>
<i>Astragalus glycyphyllos</i>	14			<i>Trifolio-Geranieta</i>
<i>Atriplex patula</i>	3		arch	Synanthropic
<i>Avena fatua</i>	10		arch	Synanthropic
<i>Ballota nigra</i>	3		arch	Synanthropic
<i>Betula pendula</i>	16			Rest
<i>Brachypodium pinnatum</i>	32			<i>Festuco-Brometea</i>

<i>Brachypodium sylvaticum</i>	11		<i>Quercu-Fagetea</i>
<i>Bromus benekenii</i>	10		<i>Quercu-Fagetea</i>
<i>Bromus erectus</i>	12		<i>Festuco-Brometea</i>
<i>Bupleurum falcatum</i>	10		<i>Trifolio-Geranietea</i>
<i>Calamagrostis epigejos</i>	30		Rest
<i>Campanula patula</i>	7		Rest
<i>Campanula rapunculoides</i>	24		<i>Trifolio-Geranietea</i>
<i>Campanula rotundifolia</i>	8		Rest
<i>Campanula trachelium</i>	5		<i>Quercu-Fagetea</i>
<i>Capsella bursa-pastoris</i>	14	arch	Synanthropic
<i>Carduus acanthoides</i>	23	arch	Synanthropic
<i>Carduus crispus</i>	4	arch	Synanthropic
<i>Carduus nutans</i>	3	NT	Synanthropic
<i>Carex contigua</i>	8		Rest
<i>Carex hirta</i>	7		Synanthropic
<i>Carex muricata</i> agg.	7		Rest
<i>Carlina vulgaris</i>	12		<i>Festuco-Brometea</i>
<i>Carpinus betulus</i>	17		<i>Quercu-Fagetea</i>
<i>Caucalis platycarpos</i>	4		Synanthropic
<i>Centaurea cyanus</i>	10	NT arch	Synanthropic
<i>Centaurea jacea</i>	9	NT	Rest
<i>Centaurea scabiosa</i>	30		<i>Festuco-Brometea</i>
<i>Centaurea stoebe</i>	3		Rest
<i>Cerastium arvense</i>	11		Synanthropic
<i>Cerastium holosteoides</i> ssp. <i>triviale</i>	10		Rest
<i>Cichorium intybus</i>	5	arch	Synanthropic
<i>Cirsium acaule</i>	9	NT	<i>Festuco-Brometea</i>
<i>Cirsium arvense</i>	96	arch	Synanthropic
<i>Cirsium palustre</i>	5		Rest
<i>Cirsium vulgare</i>	27	arch	Synanthropic
<i>Clinopodium vulgare</i>	7		<i>Trifolio-Geranietea</i>
<i>Consolida regalis</i>	14	arch	Synanthropic
<i>Convolvulus arvensis</i>	54	arch	Synanthropic
<i>Conyza canadensis</i>	11	neo	Synanthropic
<i>Cornus mas</i>	7		<i>Quercu-Fagetea</i>
<i>Cornus sanguinea</i>	29		<i>Quercu-Fagetea</i>
<i>Corylus avellana</i>	6		<i>Quercu-Fagetea</i>

<i>Viola reichenbachiana</i>	4		<i>Quercu-Fagetea</i>

Electronic Appendices 2-8 Conditional inference trees testing the effect of phytogeographic region (thermophyticum, mezophyticum), soil substratum (basic, acidic), soil moisture (wet, mezic, dry), successional age, and altitude on the total relevé species richness (S3) and those of the individual species categories (S4-6). Significant predictors are shown in oval windows, while the number of relevés in each group (n) and their mean species richness (y) in green boxes.
