

Rhamnus prunifolius SIBTH. et SM. Found in Dalmatia (Croatia, Yugoslavia)

Rhamnus prunifolius SIBTH. et SM. nalezen v Dalmácii (Chorvatsko, Jugoslávie)

Miloš Král

KRÁL M. (1972): *Rhamnus prunifolius* SIBTH. et SM. found in Dalmatia (Croatia, Yugoslavia). — Preslia, Praha, 44 : 277. — A range extension is reported for *Rhamnus prunifolius*. The species was found in the vicinity of Split, Croatia, and is new for the flora of Yugoslavia. The locality constitutes the northernmost limit of the distribution area. — Klatovy 496/III, Czechoslovakia.

Rhamnus prunifolius SIBTH. et SM. is a Mediterranean species of disjunct distribution. In Flora Europaea its distribution is described as follows: "Greece and Kriti", in Flora of Turkey "SE. Spain" is added. (The species occurs in the Greek Aegean Islands — Lesbos and Chios — treated in Flora of Turkey, not in Turkey proper.) In 1970 this dwarf *Rhamnus* was found for the first time in Yugoslavia. The locality of the collection was as follows: Jugoslavia, Croatia, Dalmatia, distr. Split; in declivibus fruticosis et saxosis orientem versus a vico Klis-Grlo; alt. ca. 400—500 m s. m., solo lapidoso, calcoso, expos. occid.; 17. 8. 1970; M. KRÁL [3077]; in PRC et ZA.

Of the other species found in the locality the following could be determined: *Paliurus spinachristi* MILLER, *Tithymalus spinosus* (L.), *Genista sylvestris* SCOP. subsp. *dalmatica* (BARTL.) LINDB. fil., *Satureja montana* L., *Allium moschatum* L., *Paronychia kapela* (HACQ.) KERNER subsp. *kapela*, *Carex liparicarpus* GAUD., *Medicago prostrata* JACQ., *Teucrium montanum* L., *Linum tenuifolium* L., *Ceterach officinarum* DC. s. str.

Souhrn

Rhamnus prunifolius SIBTH. et SM. byl poprvé nalezen v Jugoslávii. Jedná se o nejsevernější lokalitu celkového areálu.
