Skokanová K., Šingliarová B., Španiel S., Mereďa Jr. P., Mártonfiová L. & Zozomová-Lihová J. (2022) Relative DNA content differences reliably identify *Solidago* ×*niederederi*, a hybrid between native and invasive alien species. – Preslia 94: 183–213.

Supplementary Table S3. – Polymorphisms in ITS sequences of *Solidago* individuals, arranged by populations; population codes (Pop. code) according to Table 1, taxa codes: C – *S. canadensis*; N – *S.* ×*niederederi*; V – *S. virgaurea*; G – *S. gigantea*; I_C, I_N – supposed introgressants of *S. canadensis* and *S.* ×*niederederi* (see Results); ssp – material from single-species populations. For population codes, see Table 1. Seven positions that display parental species-specific base substitutions and additive patterns in the hybrids are highlighted with a grey background.

| Pop. code | Taxon code | Individual code | Position in the alignment | | |
