

**Padullés Cubino J., Fibich P., Lepš J., Chytrý M. & Těšitel J. (2023) Do threatened species occur in species-rich vegetation? – Preslia 95: 297–310.**

**Supplementary Table S2.** The community species richness values of individual threatened species occurring in forests and grasslands.

The  $S_c$  values for individual threatened species in forests. We did not calculate the range and skewness of  $S_c$  values for species occurring in less than five plots (blank cells).

<b>Species names</b>	<b>National Red List category</b>	<b>IUCN Red List category</b>	<b>Number of plots</b>	<b>Mean <math>S_c</math></b>	<b>Median <math>S_c</math></b>	<b>Q1</b>	<b>Q3</b>	<b>Skewness</b>
<i>Achillea nobilis</i>	Threatened	Non-threatened	3	36.22	42.61			
<i>Achillea pannonica</i>	Threatened	Non-threatened	8	38.64	42.73	29.66	48.1	-0.53
