

Distribution of *Echium plantagineum* in the Czech Republic

Author of the map: Zdeněk Kaplan

Map produced on: 03-10-2022

Database records used for producing the distribution map of *Echium plantagineum* published in Preslia.

Coordinate system: WGS84.

The mapping symbols used in the distribution map to indicate the different attributes of the occurrence in a particular grid cell.

| Attribute distinguished | Symbol | Attribute state                                                                                                                   |
|-------------------------|--------|-----------------------------------------------------------------------------------------------------------------------------------|
| None                    | ●      | all records                                                                                                                       |
| Time                    | ●      | recent occurrence (at least one record since 2000)                                                                                |
|                         | ●      | old occurrence (all records before 2000, or demonstrably being extirpated from all localities after 2000, or all records undated) |
| Origin                  | ●      | native (at least one record)                                                                                                      |
|                         | ×      | alien                                                                                                                             |
| Source data             | ●      | a revised herbarium specimen (at least one record)                                                                                |
|                         | ▲      | all other                                                                                                                         |
| All                     | ?      | only record(s) uncertain regarding identification and/or locality                                                                 |

Excerpt Atlas: Taxonomic Experts' Records (managed by Institute of Botany, The Czech Academy of Sciences)

The records listed below are arranged according to the grid numbers and given in their original language, usually in Czech, German or Latin. The following header fields are used: původní jméno – original name (original identification, received as or published as); lokalita – locality; nejbližší obec – nearest city, town or village; souřadnice – geographic coordinates; nadmořská výška – altitude; fytochorion – phytogeographical district; datum – date; nálezcce – author of the field record or collector; pramen – source; herbář – herbarium collection; projekt – project; poznámka – comments imported into the Pladias database or added later; původnost – geographic origin (původní – native; nepůvodní – alien); ID – record ID.

**6051d**

původní jméno: *Echium lycopsis*

lokalita: zwischen Cernosice [= Černošice] und Dolni Mokropsy [= Dolní Mokropsy] südwestlich Prag

nejbližší obec: Černošice, okres Praha-západ

souřadnice: 49°56'55.50"N, 14°19'45.50"E, ± 500m

fytochorion: 41. Střední Povltaví

datum: 1940-09-10

nálezce: M. Petráň

pramen: Klotz G. (1963) Die *Echium*-Arten der ČSSR. – Wissenschaftliche Zeitschrift der Martin-Luther-Universität Halle-Wittenberg, ser. math.-natur., 12: 137–142.

herbář: PRC

projekt: Excerpt Atlas

poznámka: "... Pflanze aus, die M. Petran am 10. 9. 1940 zwischen Cernosice und Dolni Mokropsy südwestlich Prag sammelte, die ich im Herbarium des Botanischen Institutes der Karls-Universität als *Echium vulgare* L.? vorfand."; Poznámka Zdeněk Kaplan:

Citovaný doklad v herbáři PRC v roce 2022 nenalezen, momentálně nezvěstný.
